How to delete an object

Permanently remove an object.

1. Click **Insight** in the left sidebar.
2. Under **Insight**, click **Object Schemas** and select an object schema.
3. Select an object type, at left, and click **Objects** at top to view the object listing.
4. Select the object you want to edit from the list.
5. Click **More**, at top, and click **Delete**.
6. In the dialog box, click **Delete** to confirm. Deleting this object will remove it permanently.
