How to create an object

Create a new object in your object schema.

1. Click **Insight** in the left sidebar.
2. Under **Insight**, click **Object Schemas** and select an object schema.
3. Click **Create Object** at top.
4. In the Create Object dialog:
   a. Select an **Object Type** for the object.
   b. Enter a **Name** for the object.
5. Depending on the object type, there may be more attributes available that require information.
6. Click **Create** at bottom-right. To create a series of new objects, click **Create another** and then click **Create**.
