

Jira Users Import

This import type will import Jira Users into Insight. This is only the "User" part of the [Jira Environment import](#).

Some use cases could be:

- Need to relate your users to customers in Insight?
- Want to extend the user information with more attributes?
- And so much more...

Import Type Fields

These are the module type specific fields that need to be configured for this import type:

Setting	Description
Restrict Groups	Only users in selected group(s) will be imported
Include Inactive users	Specify if we should include inactive users from source

Object Type Mapping configuration

Name	Description
Selector	The selector for the Jira User import is not used. User IQL to filter any data from the User data

Predefined Structure & Configuration

To be documented
